[linkedin.com/in/catedeguzman](https://www.linkedin.com/in/catedeguzman)

Results-driven professional with 5+ years of experience in project coordination, cross-functional collaboration, customer account management, and operational governance. Skilled in managing end-to-end project delivery, tracking milestones, resolving escalations, and driving process improvements. Experienced in building compliance dashboards using MS Excel, coordinating projects using Agile methodologies, and supporting enterprise environments with Microsoft Teams and SharePoint. Strong analytical thinking, stakeholder communication, and documentation skills aligned with project management best practices.

WORK EXPERIENCE

Customer Solutions Manager
Sutherland

Jan 2020 – Mar 2025

- Managed project tracking and governance for employee verification processes, ensuring 100% completion by defined deadlines across a large workforce portfolio
- Created and maintained MS Excel dashboards for compliance reporting, providing leadership with real-time visibility into verification status, trends, and risk indicators
- Owned cross-functional coordination between operations, product, and engineering teams to unblock execution issues and drive timely resolution of escalations
- Maintained detailed project trackers, issue logs, and documentation of customer interactions and resolutions to support governance and process optimization
- Identified recurring operational pain points and conducted root cause analysis, contributing to workflow improvements that enhanced service efficiency
- Served as escalation lead for complex technical issues, managing tracking of risks, actions, and dependencies through to closure
- Coordinated initiative planning and status reporting using Microsoft Teams and SharePoint, ensuring a single source of truth for all action plans and key project artifacts
- Monitored KPIs and operational performance metrics, presenting insights and trends to leadership to support data-driven decision-making

Login Administrator
Sutherland

Aug 2018 – Dec 2019

- Managed user roles, permissions, and access controls while ensuring compliance with security policies and governance standards
- Conducted system audits and risk assessments to proactively identify vulnerabilities and prevent access issues
- Supported authentication processes and efficiently resolved login and account-related concerns
